

Ephesoft Transact Technical Overview

Information Trapped in Unstructured Content

Ephesoft Transact is a smart document capture and data classification solution that extracts meaningful data from documents from any format in the cloud or on-premises. That data feeds into your back-office applications to accelerate the pace of business transactions and processes. Our Smart Capture® solutions can automatically identify the information you need without manual data entry, sorting or scanning separator sheets with barcodes.

Through patented supervised machine learning algorithms, Ephesoft enables businesses to better classify documents by content analysis, bar code or layout. The system recognizes and captures data using OCR and ICR engines, fixed formats, free form extraction and fuzzy database logic. The Ephesoft platform is ideal for organizations with a heavy document load that drives your sales orders, insurance claims, mortgages, mailrooms, invoices or any other critical business process.

Ephesoft Transact Technology

Zero footprint, browser-based application that runs on servers behind your firewall, Amazon Web Services or Microsoft Azure.

Java-based open architecture using industry standard tools to ensure customers are not locked into a proprietary stack.

Patented supervised machine learning technology that improves over time, increasing value.

Web Services APIs and mobile capture tools.

Easy Integration

The only document capture and extraction system to employ RESTful APIs, making ERP, CRM, document management and other back office programs document capture enabled.

Business Intelligence

Ephesoft's platform offers business intelligence tools to optimize efficiency, accuracy and allows users the ability to make better decisions about their data. Advanced reporting, dashboards, performance levels and analytic tools offers insight and achieve higher ROI.

100% Browser Based

A thin client architecture for Windows and Linux environments powers Ephesoft's fully customizable and scalable advanced capture platform, providing unlimited, uncapped document identification.

Our Technology

Ephesoft's modern, innovative and cloud-ready platform outshines legacy server applications, helping companies in any industry drive efficiency, accuracy and cost savings.

What Our Customers are Saying

“Ephesoft has a great technology stack, it's got very effective pricing and it really fits the integration really well, which others do not do”

— Michael Kienle, CEO at it-novum
